Electrical & Computer Engineering Student (3 semesters remaining)

Motivated and detail-oriented third-year Electrical & Computer Engineering student specializing in **Communications and Computer Systems**.

Possesses a strong system-level understanding and a collaborative mindset for complex environments.

Seeking a student position in Hardware Verification, DFT, or communication-related hardware roles.

Experience Oct 2024 - present

Private Tutor – Electrical Engineering Core Courses (Ben-Gurion University)

Provided individual tutoring in Semiconductor Devices, Electrical Circuits, Analog Electronics, and Electromagnetic Fields.

Projects

SimpleRisC - CPU RTL design and Verification (Personal Project, Oct 2025 – Present)

- Designed and verified **ALU, Control Unit, Register File, and Memory** modules with comprehensive testbenches in **ModelSim** using SystemVerilog.
- Performed **synthesis and implementation in Vivado**.
- GitHub: github.com/matan-roei-labs

Education Oct 2023 - Present

B.Sc. in Electrical & Computer Engineering (Communications & Computer Systems Track)

Ben-Gurion University of the Negev | Expected Graduation: 2027 | GPA: 78

Skills

- **Hardware & Verification:** SystemVerilog, ModelSim, RTL Design, Testbench Development
- **Design Tools:** Vivado, FPGA Synthesis
- **Programming:** Python, C/C++
- **Fields:** Processor Architecture

Languages

- **Hebrew:** Native
- **English:** Professional Proficiency

Army

IDF Intelligence Corps | Mar 2015 – Apr 2018

- Clerk and Operations Room roles: managed classified communications and data coordination.
